- **Database:** Microsoft SQL Server and Microsoft Access
- **Design:** Adobe Fireworks, Adobe Photoshop
- **Platform:** Windows Server 2003/2008 and Windows 2000/XP/Vista/7

WORK EXPERIENCE

Senior Web Developer and Designer

March 2004 - 2010

Rayanravesh Co., Sanandaj

- I was the project manager for developing a Content Management System for Ministry of Interior of Kurdistan Province (www.ostan-kd.ir). This CMS was developed in .NET Platform and Microsoft SQL Server was used as the backend data storage. The website provides a central point of access for their services. We later used the CMS for a few more websites such as ghorveh.gov.ir, bijar.gov.ir, sarvabad.gov.ir, divandareh.gov.ir, saghez.gov.ir and sanandaj.gov.ir.
- Rayanravesh provides internet access for more than 70 percent of Sanandaj city. Users need a way to manage their account and view their usage report from home. We developed an online reporting and account management system on top of company's RADIUS server. The application was developed with ASP.NET; we also used ASP.NET AJAX to enhance the user experience.
- Designed and developed websites for different clients of the company such as Kurdistan Tractor Manufacturer (www.ktm.co.ir), kurdistanroad.ir and taavon-boushehr.ir.
- Developing company's website was my first task entering Rayanravesh. I developed the website single handed as I was getting more familiar with different aspects of web development. I used ASP.NET/C# to develop it and used XML files as a storage place for dynamic content. This site has been serving the company for past 5 years very well. You can visit the website from www.rayanravesh.com address.

Freelancer Software Developer

January 2007 - 2010

- As a freelance software developer, I have been spending some of my free time remotely helping digitalbucket.net, LLC team to develop a Web 2.0 online storage and collaboration website. We have used ASP.NET, SQL Server, Amazon Web Services and EXT to create the best user experience. Digitalbucket.net is a fast growing company, currently serving more than 8000 customers.

EDUCATION

Isfahan University of Technology

1999

- B.S., Software Engineering

AWARDS / RECOGNITION

Microsoft ASP.NET AJAX Contest

2006

- Got honorable mention in Microsoft ASP.NET AJAX (ATLAS) contest held by Microsoft.
